

Marin County IPM Program Application for Limited Use and Notification Exemption

Person requesting: Dave Hatterm Date: 9/26/11

Department: Parks Phone: 415-507-4046

Proposed Material: Fusilade II EPA Reg. No. 100-1084

Active Ingredient: Fluazifop-P-Butyl Technical (24.5%)

Amount of Material Needed: Up to 4 oz.

Location of Proposed Use: Hal Brown Park at Creekside – Isolated patches of Bermuda grass in shrubs.

Reason why Restricted: * Fluazifop is not likely to be a carcinogen. It may have reproductive toxicity. This product is toxic to fish and aquatic life. The application will not be made near the marsh.

Reason for Need: Bermuda grass at the park has been pulled and sprayed. There are small Bermuda grass plants inside landscape plants that will spread and take over. The recent investment in the park renovation needs to be protected. This may help keep this weed out of the marsh habitat

Options/Alternatives: The alternative for getting rid of Bermuda in broad leaved shrubs is to remove the shrub, dig out the Bermuda, plant a new shrub and hope. Bermuda grass is very tenacious and even a small piece can start the infestation again. No application will take place in turf.

Plan to Preclude Future Use: Eliminate the Bermuda grass inside shrubs. Hand pull as much of the Bermuda grass as possible.

Time Period Needed: Desired application date: one day between 9/30—10/4/11 (TBA)

Request Approved.
