

**Marin County IPM Program  
Application for Limited Use and Notification Exemption**

---

Person requesting: Dave Hattem Date: 10-31-2012

Department: Parks Phone: 415-473-4046

Proposed Material: - Aquamaster and Liberate

EPA and Cal. EPA Reg. No. - 524-343 and CA 34704-50030-AA

Active Ingredient: SF Glyphosate and soy oil based surfactant

Amount of Material Needed: Up to 100 oz. for turf renovation

Location of Proposed Use: Lagoon Park Island

Reason why Restricted: \* These products are on the Marin County IPM Use List. The Exemption Request is for the use of these products on turf. As part of the IPM policy we do not make applications to turf unless the area is fenced off from the public. Currently the site is fenced and will remain fenced for at least the 4 days after application.

Reason for Need: The island in the lagoon recently had a major renovation and sod was placed on approximately 90% of the area. 10% of the island was left untouched, but will need to have sod placed there soon as a separate project. We will need to eliminate the weeds that exist on the site before we lay new sod or the investment will be wasted.

Options/Alternatives: The invasive weeds currently on the site cannot be economically removed by mechanical means in a timely manner.

Plan to Preclude Future Use: Once the sod is laid the weeds can be controlled by hand weeding

Time Period Needed: Desired application date: one day between 11/5-8/12

Request Approved,

Request Denied
